Teaching Strategies: Self-paced, online virtual interactive videos, quizzes, and exam, Online virtual training

Course Description: Technology is shaping the way we deliver healthcare now and in the future. It is imperative that practitioners have a thorough understanding and comfort level with the use of telemedicine in their practice. This Tele-Pharmacy Certification (TPC) course better equips healthcare professionals to provide optimal care to their patients. Healthcare professionals will enhance patient satisfaction by being able to deliver what is a patient-driven demand. Healthcare professionals may become or remain competitive in the marketplace because of the acquired skills in telemedicine application.

ENABLING PERFORMANCE OUTCOMES
After this course, certification participants should be able to perform as follows:

- Tele-pharmacy in Opioid Management: Introduce the concept of tele-pharmacy and how it

can play a pivotal role in remote consultations, monitoring opioid prescriptions, and providing patient education on safe opioid usage.

- Comprehensive Opioid Understanding: Equip participants with a thorough understanding of opioids, their classifications, and their historical significance in pain management.
- Distinguishing Opiates from Opioids: Enable learners to discern between opiates and opioids, appreciating the nuanced differences in their sources and applications.
- Awareness of Addiction Mechanisms: Foster a deep comprehension of how opioids engender addiction, emphasizing the biochemical and psychological underpinnings.
- Recognition of Opioid Use Disorder: Inculcate skills to identify signs and symptoms of opioid use disorder, aiding early detection and intervention.
- Comparative Analysis: Examine the distinctive nature of opioid addiction in the backdrop of other substance addictions, highlighting its unique challenges and implications.
- Overdose Prevention and Management: Equip participants with strategies to prevent opioid overdoses, recognize overdose symptoms, and administer timely interventions.
- Regulatory and Ethical Concerns: Educate participants on the current regulatory landscape surrounding opioid prescriptions, and emphasize the ethical responsibilities of healthcare providers in the face of the opioid crisis.Explain Telemedicine Clinical Application 3 A's
